2)	9)
3)	10)
4)	11)
5)	12)
6)	13)
7)	14)

Cooks and Asst. Cooks: ---Cooks may have to breakaway from an activity early in order to start the meal. Prepare and serve the meal ON TIME; put away extra food and put trash from the food preparation in the trash; dump hot grease before they eat; assure everyone receives an equal portion (either serve the food to patrol members and guests or tell everyone the amount they can have). The cooks serve themselves last. Try to have everything ready at the same time.

Head Clean up and Asst. Clean up: --- put wash and rinse water on to heat up during the meal if possible; Wash the dishes; wipe down the stoves, tables, and food preparation area; put away the clean dishes; dump dirty dish water ; hang dish cloths so they can dry and secure the dining area. No dirty dishes are to be left and all food is to be put away.

Waterman ---Get sufficient water for next meal including drinking, cooking and cleanup water. Should be available during the meal in case cooks need more water. If open flames are used for cooking or camp fires, have water readily available to control fire outside of fire pit/ring

Fireman: ---If the meal is to be cooked over an open fire, you may have to breakaway from an activity early in order to establish a good fire for the cooks. If stoves are being used, set up and fuel stoves. Gather fire starters and fire wood for the next meal.

Campsite Clean Up ---Check condition of fire pit, and latrine (cleanliness and TP); check condition of dining fly. Pick up trash and keep watch over open fires, take trash to dumpster after kitchen clean up is done, assist with flag pole ceremonies

Everyone: Pick up trash in camp; straighten up personal gear; check condition of tent. Make sure the area is secured for expected weather conditions.
